

# Clarin Fix

Orluna  
No. NL-CN-27-M-N-D-NA-54

Clarin is a flush downlight that positions the lamp as close to the front of the luminaire as possible. With sharp architectural styling, the angle of the face creates a soft graze when lit, adding to the visual comfort of the light so no anti-glare baffle is needed. It's the perfect fitting for maximizing light output and beam angle ranges.
