Dreispitz - Suspension Horizontal - 1 Controlled Emission - 120 - Black

Artemide

No. - - -

A single product with double emission thus adapts to the three dimensions of space with different standalone and systemic versions. Dreispitz is a functional solution that is nonetheless poetic thanks to the simplicity of its geometry and the freedom it allows to create graphic compositions that combine horizontal and vertical elements. It represents industrial intelligence that can adapt to many different applications. It can be a professional tool for office environments, a functional solution for the world of hospitality, a distinguishing feature for common areas, a unique piece that is both poetic and timeless, with the ability to blend seamlessly with any setting. It is versatile and universal. It is an unadorned, essential element that nonetheless has a strong, recognisable identity. Dreispitz is sustainable thanks to its intelligent industrial optimisation and the use of partially recycled, recyclable and easily dismantled materials. Its use leads to a good energy balance due to high efficiency and dynamic management of emissions. Dreispitz is indeed modular and dynamic not just in terms of composition but also in terms of management possibilities, which through the Artemide App offer the utmost freedom to design the perfect lighting for every situation, encouraging waste-free awareness of light and leaving everyone free to create their own lightscapes.
