

Hoy Spot - Recessed - 65 - 13° - 2700K

Artemide
No. - - -

Hoy spot is a wide range of elementary shaped yet highly-performing adjustable spotlights. It dialogues with the Hoy system, Hoy XL system and Hoy linear stand alone modules. Hoy spot was designed in a 90 mm diameter and is now presented also in 65 mm diameter introducing a new lenses with a low glaring TIR optical technology. In Hoy spot a simple cylinder protrudes from the surface at varying heights depending on the versions (recessed, semi-recessed, SMD, three-phase track). Its volume is divided to direct the emission into the space; the movable part encloses the source and optics required to shape four different beam angles.
