

Puzzle Mega Square Large

Lodes

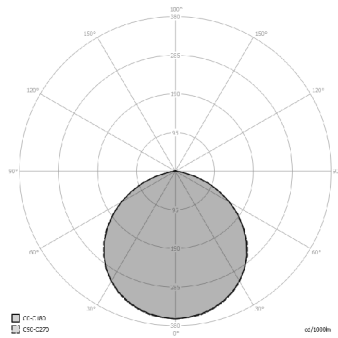

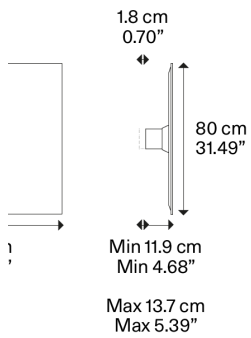

No. 16745 2030

All Puzzle Mega lamps feature a structure in matte white metal and are fitted with a spacer for the wall or ceiling. The compositions can be developed by overlapping the various lamps using dedicated accessories. The round version is available with diameters 53 and 80 cm, the square version measures either 53 or 80 cm per side. Depending on the size, each lamp houses 3 to 4 LED light sources, each 15W. The light colour temperature can be warmer, 2700K, or cooler, 3000K. The colour rendering index (CRI) of 92 mirrors the true colour of objects without distorting them.

Matte Black
